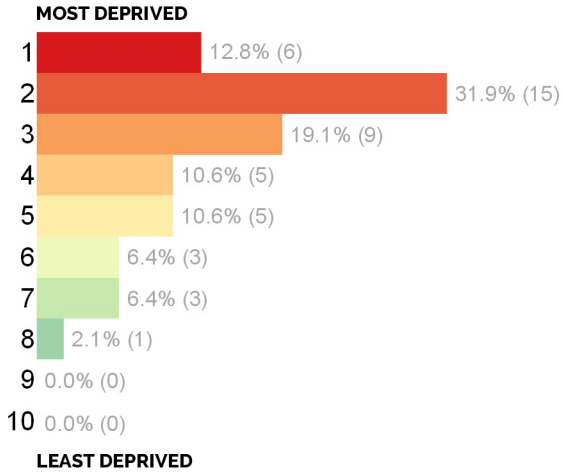
Local Authority Deprivation Profile



About this map

This map shows relative overall deprivation in **Blaenau Gwent** by Lower Super Output Area (LSOA). LSOAs have an average population of around 1500 people. The coloured bars above match those on the map, and show the proportion of LSOAs in Blaenau Gwent that fall within each national deprivation decile for Wales. LSOAs in Decile 1 are among the 10% most deprived in Wales, while LSOAs in Decile 10 are among least deprived 10%. "Rank" shows how Blaenau Gwent compares with other LAs in Wales, based on the proportion of LSOAs that are within the most deprived 30% nationally. It is important to keep in mind that there will be many people living in the most deprived areas who may not be deprived. Conversely, there will be people living in less deprived areas who are deprived. For more information on the 2019 Welsh Index of Multiple Deprivation, and a full description of the data and methods used to create this map, visit the project website: (rpubs link here).
